### 4.3 Full Quick Pick

Full Quick Pick is a fully automatic number selection method whereby the terminal generates all of the numbers, according to the game rules. The player should mark the Quick Pick box on any one of the eight (8) boards, together with the preferred game type. The player should also mark the basic stake.

## 4.4 Partial Quick Pick

Partial Quick Pick is a semi-automatic number selection method, whereby the system generates numbers complementary to the numbers selected by the player or authorised agent. If the player chooses only some of the numbers in the Numbers Area on one board, the rest of the numbers for the same board are quick picked by the system.

## 4.5 Different Playing Methods on One Playslip

The terminal allows the player to include different playing methods on one playslip. For example, on the same playslip, the player can play a Simple Column in the first Board, Systems in the second Board and a Quick Pick in the other Boards.

## 4.6 Cancellation of Playing Board

The player is allowed to cancel one or more of the filled in Boards on the playslip by marking the [VOID] box of the relevant Numbers Area.

## 4.7 Shares

Shares offer the possibility to a group of players to take advantage of, and participate with more numbers and combinations, thus giving the players more chances to win. This is made possible by splitting the Super5-4-3-2-1 ticket into 8 to 100 shares. The price of the total Super5-4-3-2-1 ticket is split equally between the number of players.

All players pay their shared Super5-4-3-2-1 ticket separately and get their own share of the Super5-4-3-2-1 ticket receipt. For example, if a €40 ticket is split into ten (10) parts for ten (10) players, the price of each part is €4, whereby each player pays for their share of the participation.

The minimum price of the share is €4 and the maximum price is €32.

The maximum price of the whole shared ticket shall be €5,000.
